WingX™ for Android – Supports new Motorola DROID

San Jose, CA - April 12, 2010: Hilton Software LLC today introduced WingX for Android. This latest release expands the WingX lineage of products and extends Hilton Software's lead in supported mobile smartphones in the aviation market.

WingX for Android includes a searchable A/FD, integrated AOPA Directory, zoomable NACO Charts, color-coded METARs, TAFs, Route Planning with route weather, animated RADAR images, an extensive E6B, a comprehensive set of documents including the FARs, and more. All the charts and other information is stored on the phone and is accessible when flying with no Internet access.

Dr. Hilton Goldstein, CEO of Hilton Software LLC said: "Our new WingX for Android product is great news for pilots using Verizon and other carriers. By integrating our charting, wireless, and user experience technologies, we were able to really focus on performance and user-friendliness. WingX for Android even comes with a built-in user-manual on each feature page, it's very user-friendly."

WingX is available on Android, iPhone 3G and iPhone 3GS, iPod Touch, BlackBerry, and Windows Mobile.

Availability
WingX for Android is available from the Android Market and from Hilton Software's mobile page: http://mobile.hiltonsoftware.com. For additional information about Hilton Software LLC or its products, call 866-42-WINGX or email support@hiltonsoftware.com.
