

## **WingX™ for iPhone Version 3.0 Adds GPS-Enabled Terrain-Aware Moving Map**

**San Jose, CA - September 30, 2009:** Hilton Software LLC today announced “WingX for iPhone” Version 3.0 with GPS-Enabled Terrain-Aware Moving Map. WingX’s touch-screen integration reduces heads-down time while enabling smooth scrolling across the contiguous US, Mexico, Puerto Rico, and Bahamas. WingX’s Moving Map has one-touch access to the A/FD, AOPA Directory, and NACO Approach Charts and Airport Diagrams.

“We are very excited to add GPS-Enabled Moving Map to WingX for iPhone. WingX now enables pilots to carry just one device for their moving map, DUATS, weather text and images, A/FD, AOPA Directory, and all NACO approach charts and airport diagrams in the US. Modifying the route, obtaining A/FD or AOPA Directory information or viewing an approach chart is initiated by one tap on the identifier. No knob twiddling or complicated instructions. WingX for iPhone Version 3.0 is also faster, uses less memory, adds TFR images, A/FD information for Puerto Rico and the Bahamas, and adds aircraft lookup. All this for under \$100.” said Dr. Hilton Goldstein, company founder and CEO.

WingX for iPhone runs on iPhone, iPhone 3G, iPhone 3GS, and iPod Touch. WingX for iPhone Version 3.0 requires iPhone OS 3.0 (or later).

### **Availability**

WingX for iPhone is available now in the Apple App Store. WingX for Windows Mobile and WingX for BlackBerry are available directly from Hilton Software LLC’s website [www.hiltonsoftware.com](http://www.hiltonsoftware.com). For additional information about Hilton Software LLC or its other products, please call 866-42-WINGX or email [support@hiltonsoftware.com](mailto:support@hiltonsoftware.com).
